** This training plan is only a guide, not your training bible. You will need to modify it as life happens (and work, kids, sickness, things will get in the way). It's been our experience that consistency is the greatest tool for improvement so if you don't have time to do what the schedule suggests then don't throw in the towel. Do something, yes, even if you only have 10 minutes to spare. Do not try to make up for missed workouts, just pick up the schedule where you are when you return to training. And do not ever worry about your pace. Remember you are lapping every woman that is sitting on the couch.
